

BIT THAT'S BEEN KEPT

Notice, however, that parallel to this is another arrow marked 'power over subjects', which runs likewise from 'Powerful actor(s)' into the 'Subjects' box. Why should you care about power over subjects, from a political point of view? (You might, of course, be interested in power over them as a way of getting things you want them to do directly, but that is outside the scope of the present survey.) The answer is that there is (we are assuming) a large overlap between subjects and voters. If power over subjects translates into voters' decisions about the identity of rulers, then power over subjects is also indirectly power over rulers. For the voters' power to determine the identity of decision-makers is, as I

government would lose electoral popularity unless it acceded to the truckers' demands. This manoeuvre was successful to the extent that the French government caved in, and the other governments that stood firm did lose support. The British government, for example, lost its lead in the public opinion polls for the first time since the last election and is now making promises of significant concession. government would lose electoral popularity unless it acceded to the truckers' demands.
